# Control iD

RHiD
Time Attendance Software

The revolutionary RHiD platform,
developed by Control iD, is
a complete cloud-based solution
that allows effective time attendance
control for teams of all sizes.
With RHiD, all the information
can be accessed through a browser
or mobile app without the need
of local data storage.
RHiD provides real-time collaboration
between managers, employees
and equipment offering convenience
and control for HR management.
In addition, the software updates are
automatic and quickly made available to
customers, with constant new functionalities
and configuration possibilities.

WEB Platform

Mobile application

- Cloud-based platform

- Mobile application available for Android and iOS

- Real-time collaboration

- Customizable shifts, schedules and attendance settings

- Ideal for teams of all sizes

TECHNICAL SPECIFICATIONS

EASY TO USE

RHiD was developed with focus on usability, making
HR manager and employee experience as intuitive
as possible. The system is cloud-based and no
installation is required. The 100% web interface
allows any device to access it.

CONVERGENCE

The solution integrates Control iD's equipment with
an app that operates on Android and iOS and also offers
the possibility of punching in and out to the employee.

INTEGRATION WITH EQUIPMENT

The system is integrated natively with Control iD's equipment
which allows bidirectional synchronism of information
without the need of human intervention. It also integrates
with equipment of other manufacturers through AFD files.

TIME ATTENDANCE CONTROL

RHiD allows time attendance control in a very flexible way,
catering to a wide range of companies, teams, unions and
workflow cenarios. It also offers the possibility to register
an unlimited number of employees and companies.
